

JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Freshly retired, after spending many years working with his brother to manufacture their crane company into an industry leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

Whilst on their journey, John spent time talking to former business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered a considerable market for a product that could swiftly and securely elevate people in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John established a partnership with two friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they designed and sold the first JLG aerial work platform. The business incorporates some of the simple design essentials of that original lift into existing designs.

JLG forklifts have come a long way since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. At present, the company proudly continues to expand itself into numerous marketplaces globally and develops new products to make sure customers are capable of being more effective and perform in the workplace within a safer atmosphere.
